- 11 Time

Installations

Please enter into menu settings to set up the date & time and other settings before installations.

- * Setting method please refer to Setting before Use.
- * All the data are factory defaults if not set up .

1. Please insert the suction cup holder with GPS into the slot of the main unit and turn the screw to tight them together.

- * Left turn the knob of suction cup holder to loose and adjust the angle and right turn to fix it.

2. If need to use GPS function, please connect the GPS cable to the GPS jack on Mobile-i.

- * The GPS option in menu should be set in KMS/H or Miles/h .
- * GPS receiver with GPS mark should be faced to sky.
- * With shockproof or anti-blast film on windshield, it may affect the satellite signal.
- * GPS signal will be affected according to different places and surroundings.
- * Normally it takes about 5mins to get the satellite for GPS.

3. Please clean up the windshield (inside), put the holder in front of rear mirror, and then press the lever down to ensure the holder was fixed well.

4. Use the USB cable and dual USB Mini car charger to connect Mobile-i to socket.

Video Recording

1. Connect HD 720P + GPS + GSENSOR to socket by Duel USB Car Charger and start engine, it'll turn on and start recording automatically. Now the real time image will show on LCD display. Stop engine, it will keep on recording for about 10 seconds and then shut down automatically. If you don't want it keep on recording during your driving, please manually long-press on the <Power Switch> to turn off it.

- * When you set HD 720P + GPS + GSENSOR in loop recording, you can choose every movie clip in 1min, 3mins or 5mins. Recording time depends on the SD card memory. After SD card memory is full, it will erase the first movie clip to free up the memory for continue recording.

- * If there are any bumpy or collisions during recording, the recorded movie clip together with the one before and after it will be locked and save forever. You can not directly delete the videos which are locked. If you want to delete, please release the lock first and then delete. You can also format the Mobile-i to delete or connect it to computer to delete. (Please refer to Video Deletion for details.)

- * No movie clip will be locked if the G-sensor function is not in use.
- * There are four levels "1 / 2 / 3 / 4" for G-sensor setting, 1 is the lowest and 4 is the highest. If there are any bumpy or collisions reach the the setting level during recording, the recorded movie clip together with the one before and after it will be locked and save forever.

- * When 720P + GPS + G-sensor is not in loop recording, every movie clip will be saved in 1.78GB. It'll stop recording after the SD card is full.

- * Please use our standard Duel USB Charger and USB cable for power supply or it may not successfully charged by the ones from others.
- * Some kinds of vehicles are designed for long-term power supply that can't shut down automatically and need manually press on <Power Switch  > to save the video and turn off Mobile-i.
- * Under loop recording is set in off, Mobile-i will save the videos and stop recording automatically when the memory card is full.

2. If HD Mobile-i isn't connecting to the socket, please manually press on <Power Switch  > to turn it on, and then real time image will display on the screen and press on <Power Switch  > to start video recording. Press on <Power Switch  > again to stop recording and save video. Long press on <Power Switch  > to turn it off.

- * The first time you use Mobile-i, we suggest charge its battery for about 3 hours.
- * If you won't use Mobile-i for a long time, please recharge the battery up in every two months to prolong its' service life.
- * If the power is too low to turn on, please check the date and time after complete the charge.

Video Playing

1. Play video by Mobile-i LCD display.
